

## **AIR QUALITY SERVICES**

### *Representative Project Summary*

- Client** The Goodyear Tire & Rubber Company
- Location** Texas Gulf Coast
- Project Summary** TITAN is conducting ongoing compliance and permitting support for sites located in Bayport and Beaumont, Texas.
- Services Provided** TITAN provided the following specific services:
- Title V Renewal and Revision Applications –TITAN made recommendations for and summarized CAM and Periodic Monitoring requirements. TITAN worked directly with environmental staff to identify changes at the sites that would trigger new applicability. TITAN evaluated new and revised regulations to determine whether new applicability determinations should be incorporated into the respective Title V permits. TITAN reviewed draft permits and negotiated permits terms and conditions.
  - NSR Permit Amendment Application – TITAN developed a site-wide air permit amendment application which fully reflected the client’s current operations. TITAN incorporated existing Permit By Rules and Standard Permits, developed storage tank emission calculations, Evaluated streams routed to the flare, and revised laboratory vent and flare calculations. TITAN submitted a technically and administratively complete application including a BACT analysis and a regulatory applicability summary for the site.
  - On-Site Support – TITAN staff were placed on site at two locations to provide support for permitting, compliance evaluation, LDAR counts, public notice, Permit By Rule documentation, and stack testing coordination for an emissions reduction project which included bid evaluation, contract negotiation, test plan oversight and evaluation of results. TITAN staff also maintained records of emission events and other miscellaneous daily environmental activities.
